

Technical Features

- › Direct acting, directional control valve with bankable mounting interface
- › Designed to be assembled in series or parallel, mounting up to 8 body modules
- › High transmitted hydraulic power up to 250 bar, optimized design to minimize the pressure drop
- › Housing with three chambers for production cost savings
- › The valve is available with interchangeable DC solenoids
- › Wide range of solenoid electrical terminal versions available
- › Wide range of interchangeable spools and manual overrides available
- › Suitable for compact applications in the mobile and mini-power pack industries
- › Space and cost saving! With optional end valves
- › No need for bar manifold to construct complex circuit assemblies from stock
- › In the standard version, the valve housing is phosphated and steel parts are zinc-coated for 240 h protection acc. to ISO 9227
- › Enhanced surface protection for mobile sector up to 520h salt spray acc to ISO 9227 available

Technical Data

Valve size	03		
Max. flow	l/min (GPM)	20 (5.3)	
Max. operating pressure at port P, A, B	bar (PSI)	250 (3630)	
Max. operating pressure at port T	bar (PSI)	210 (3050)	
Fluid temperature range (NBR)	°C (°F)	-30 ... +80 (-22 ... +176)	
Fluid temperature range (FPM)	°C (°F)	-20 ... +80 (-4 ... +176)	
Ambient temperature range	°C (°F)	-30 ... +50 (-22 ... +122)

RPEL1-04

Size 04 (D02) • Q_{max} 30 l/min (8 GPM) • p_{max} 250 bar (3600 PSI)

Technical Features

- > Direct acting, directional control valve with subplate mounting surface acc. to ISO 4401, DIN 24340 (CETOP 02)
- > Compact design with reduced solenoid dimensions
- > Three chamber housing design for production cost saving
- > The valve is available with DC solenoids and a wide range of electrical terminals
- > Solenoid electrical terminal options acc. to EN 175301-803-A, AMP Junior Timer and Deutsch DT04-2P
- > Wide range of interchangeable spools and manual overrides available
- > The coil is fastened to the core tube by a retaining nut, and can be rotated by 360° to suit the available space.
- > In the standard version, the valve housing is phosphated and steel parts zinc-coated for 240 h salt spray protection acc. to ISO 9227
- > Enhanced surface protection for mobile sector available (ISO 9227, 520 h salt spray)

In case of solenoid malfunction or power failure, the spool of the valve can be shifted by manual override as long as the pressure in port T does not exceed 25 bar (363 PSI). For alternative manual overrides contact our technical support.

Spool Position Sensor

S1 - Circuit diagram for the normally - **OPEN** sensor

S4 - Circuit diagram for the normally - **CLOSED** sensor

Function of the position sensor:

In the basic position (when the solenoid is switched off), a steel core, connected to the spool, is under the position sensor. The sensor is activated, it means contacts of the sensor S1 are closed and contacts of the sensor S4 are open. After switching on the solenoid the spool with core moves out of the sensor range and the sensor is deactivated.

Technical Data of the Sensor		S1, S4

Dn 06 (D03) • Q_{max} 60 l/min (16 GPM) • p_{max} 320 bar (4600 PSI)

Technical Features

- > Direct acting directional control valve with subplate mounting interface acc. to ISO 4401, DIN 24340 (CETOP 03)
- > Cost-effective Lightline design with reduced solenoid dimensions
- > Five chamber valve design for high transmitted hydraulic power
- > Decreased dependence of function on fluid viscosity
- > Wide range of solenoid electrical terminas and supply voltage types for electromagnets
- > The coil, fastened to the core tube with a retaining nut, can be rotated by 360° to suit the available space
- > Wide range of interchangeable spools
- > In the standard version, the valve housing is phosphated and steel parts zinc-coated for 240 h protection in NSS acc. to ISO 9227.
- > Enhanced surface protection for mobile sector available (520 h in NSS, ISO 9227)

Size 06 (D03) • Q_{max} 80 l/min (21 GPM) • p_{max} 350 bar (5100 PSI)

Technical Features

- › Direct acting, directional control valve with subplate mounting interface acc. to ISO 4401, DIN 24340 (CETOP 03)
- › High transmitted hydraulic power up to 350 bar with optimized design to minimize pressure drop
- › Five chamber housing design with reduced hydraulic power dependence on fluid viscosity
- › The valve is available with interchangeable DC solenoids, also for AC power supply using a built-in rectifier bridge
- › Wide range of solenoid electrical terminal versions available
- › Wide range of interchangeable spools and manual overrides available
- › CSA Certificate upon request
- › Inductive contactless Normally Open and Normally Closed spool position sensor option
- › Soft-shift spool speed control option
- › The coil is fastened to the core tube with a retaining nut and can be rotated by 360° to suit the available space
- › In the standard version, the valve housing is phosphated. The steel parts are zinc coated (240 h corrosion protection in NSS acc. to ISO 9227)
- › With optional increased surface corrosion protection of the whole valve 520 h in NSS, e.g. for mobile applications

Spool Position Sensor

S1 - Circuit diagram for the normally - OPEN sensor

S4 - Circuit diagram of the normally - CLOSED sensor

Function of the position sensor:

In the basic position (when the solenoid is switched off), a steel core, connected to the spool, is under the position sensor. The sensor is activated, it means contacts of the sensor S1 are closed and contacts of the sensor S4 are open. After switching on the solenoid the spool with core moves out of the sensor range and the sensor is deactivated.

Spool Speed Control in millimeters (inches)

Designation T1	Important:
	<p>This directional valve provides the means to control spool soft shifting by an orifice situated in the solenoid armature. To ensure the proper function of the valve, unobstructed venting of the solenoid is required through the bleeding plug (1). The plugs are accessible after removing the rubber boot (2) from the solenoid cap nut (3).</p>
<p>Switching time ON and OFF</p>	<p>300 ... 800 ms</p>
<p>The switching times shown are valid for viscosity $\nu = 32 \text{ mm}^2/\text{s}$ (156 SUS) and nominal voltage. They depend on working pressure and flow rate of the directional control valve.</p>

Solenoid Operated Directional Control Valve with Auxiliary Lever Override

RPER3-06

Size 06 (D03) • Q_{max} 80 l/min (21 GPM) • p_{max} 350 bar (5100 PSI)

Technical Features

- › Auxiliary lever overrides for ON-OFF solenoid valves of the type RPE3-06 (Datasheet No. 4010) with Size 06 and mounting interface acc. to ISO 4401, DIN 24340 (CETOP 03)
- › Auxiliary lever operators allow the valve to be operated when electrical system is de-energized, e.g. emergency operation, electrical failures, maintenance activities
- › Manual lever and actuation element can be rotated in 90° increments for flexible installation
- › When the valve is electrically operated the hand lever remains stopped in its neutral position
- › The lever override does not affect the performances of the base valve
- › In the standard version, the valve housings are phosphated and the steel parts are zinc-coated for 240 h salt spray protection acc. to ISO 9227
- › Enhanced surface protection for mobile sector available (ISO 9227, 520 h salt spray)

The solenoid operated valves are delivered without connectors.
For available connectors see data sheet K_8008.
The orifice to the P port can be ordered separately, see data sheet SP_8010.
Mounting bolts M5 x 45 DIN 912-10.9 or studs must be ordered separately
Tightening torque is 8.9+1 Nm (6.56+0.7 lbf.ft)

For operating limits and pressure drop refer to Datasheet No. 4010 of the base valve RPE3-06.

The lever operator should never be used when any solenoid is energized.

RPER3-063 */ B19

Manual lever and actuating section is shown in the standard supplied position which is the most frequently used. Both elements can be rotated to various positions 90° apart. For other positions of lever and actuating section consult our technical department for their identification.

Mounting screws 8.9+1 Nm (6.56+0.7 lbf.ft)
M5x45 DIN 912-10,9

Technical Features

- › Solenoid operated directional control valve, spool type, with subplate mounting surface acc. to ISO 4401, DIN 24340 (CETOP 03) standards
- › Robust design of coil with high resistance to mechanical damage
- › Encapsulation enclosure solenoid version (m)
- › High transmitted hydraulic power
- › Operating pressure up to 350 bar, pressure in T- channel up to 210 bar
- › Low pressure drop achieved by design optimization
- › Five chambers housing design with reduced hydraulic power dependence on fluid viscosity
- › Wide range of interchangeable spools, optional type of manual override
- › Easily interchangeable coil with adjustable connector position by rotating the coil
- › In the standard version, the valve is zinc coated for 520 h protection in NSS acc. to ISO 9227

Functional description

Solenoid operated directional control valves in heavy-duty design have higher protection against mechanical damage, against dust, gas and moisture ingress into the coil. They are intended for operation in heavy working conditions.

Danger – safety notice

- › Always disconnect the coil from the power supply before any maintenance, assembly, disassembly or other work on it
- › For directional valves with two solenoids, one solenoid must be without supply voltage charge before the other solenoid can be charged
- › The temperature of the valve – coil surface can exceed 100 $^{\circ}\text{C}$ during the operation. There is a risk of burns
- › Damaged or malfunctioning coils (inclusive cable) must be immediately disconnected from the power supply

No designation - standard (operated by pin)	Designation N1 - metal cap nut covered	Designation N9 - without manual override
		

Installation

- Ambient operating temperature of the used connecting cable and cable gland shall be at least +105 °C (+221 °F). Use the cable shoe M3 – 0.75 mm² for wire connecting.
- Fastening torque of screws in connecting plate is 0.4 Nm (0.30 lbf.ft). Fastening torque of screws for cover is 4 Nm (2.95 lbf.ft).
- The user shall to ensure free heat emission from the coil surface during operation. The coil must not be activated alone – without connecting to the valve.
- We recommend connecting of the coil to the ground via the purpose-built ground clamp on the coil casing.

Solenoid Coil for Wire Box in millimeters (inches)

Manual Override in millimeters (inches)

No designation
- standard

Designation N2
- rubber boot protected

In case of solenoid malfunction or power failure, the spool of the valve can be shifted by manual override as long as the pressure in port T does not exceed 25 bar (363 PSI). For alternative manual overrides contact our technical support.

Spool Speed Control Orifice in millimeters (inches)

Designation T1

Important:

This directional valve provides the means to control spool soft shifting by an orifice situated in the solenoid armature. To ensure the proper function of the valve, unobstructed venting of the solenoid is required through the bleeding plug (1). The plugs are accessible after removing the rubber boot (2) from the solenoid cap nut (3).

Switching time ON and OFF

300 ... 800 ms

The switching times shown are valid for viscosity $\nu = 32 \text{ mm}^2/\text{s}$ (156 SUS) and nominal voltage. They depend on working pressure and flow rate of the directional control valve.

RPE3-062x/xS3

Size 06 (D03) • Q_{max} 80 l/min (21 GPM) • p_{max} 350 bar (5100 PSI)

Technical Features

- › Directly solenoid operated spool valve with subplate mounting interface acc. to standards ISO 4401, DIN 24340 (CETOP 03)
- › Contactless inductive spool position sensor with double output signal for safe operation (e.g. of presses or forming machines)
- › High transmitted hydraulic power and low pressure drop
- › Wide range of control voltages and solenoid electrical terminals
- › Various spool types (other possible)
- › Additional damping of the spool moving to prevent pressure surges in the circuit
- › In the standard version the valve body is phosphated. The steel parts are zinc coated (240 h corrosion protection in NSS acc. to ISO 9227).
- › With optional increased surface corrosion protection of the whole valve 520 h in NSS, e.g. for mobile applications

Connection scheme of the spool position sensor

Description of sensor:

Contactless inductive sensor with two transistor switched outputs. The output $\overline{\text{OUT 2}}$ is inverted. The double output signal is protected against mutual interference and increases the reliability of the spool end position signalization, which is important for command system ensuring the safety of such machines as presses, forming machines etc. The switching point can be set within \pm 2 mm by rotating the sensor housing with a coil after loosening the locknut (hexagon 24) and its positioning to the valve body.

- For directional valves with two solenoids, one solenoid must be de-energized before the other solenoid can be charged.
- For other solenoid voltage supply options see data sheet C_8007.
- The solenoid operated valves are delivered without connectors. For available connectors see data sheet K_8008.
- The orifice to the P port can be ordered separately, see data sheet SP_8010.
- Mounting bolts M6 x 40 DIN 912-10.9 or studs must be ordered separately. Tightening torque is 14⁺¹ Nm (10.3^{+0.7} lbf.ft).
- Besides the shown, commonly used valve versions other special models are available. Contact our technical support for their identification, feasibility and operating limits.

Spool Position Sensor

S1 - Circuit diagram of the normally - **OPEN** sensor

S4 - Circuit diagram of the normally - **CLOSED** sensor

Function of the position sensor:

In the basic position (when the solenoid is switched off), a steel core, connected to the spool, is under the position sensor. The sensor is activated, it means contacts of the sensor S1 are closed and contacts of the sensor S4 are open. After switching on the solenoid the spool with core moves out of the sensor range and the sensor is deactivated.

Technical Data of the Sensor		S1, S4
Rated power supply voltage	V	24 DC
Power supply voltage range	V	10 ... 30 DC
Rated current	mA	200
Sensor enclosure protection (EN 60529)		IP67
Max. operating pressure	bar (PSI)	210 (3046)
Switching frequency	Hz	1000
Ambient temperature range	°C (°F)	-25 ... +80 (-13 ... +176)
Technical Data of the Connector		
Power supply voltage range	V	10 ... 30 DC
Ambient temperature range	°C (°F)	-25 ... +80 (-13 ... +176)
Indicator		yellow LED

Typical configurations of the valve with a sensor:

- 3-position valve with two solenoids, equipped with two sensors
 - 2-position valve with one solenoid, equipped with one sensor on the solenoid side
 - 2-position valve with a detent assembly of spool, equipped with one sensor on the side of the solenoid which moves the spool from the basic position to the switched position according to the spool symbol
- Note:** the sensor always indicates the change of spool position realised by the energised solenoid, mounted on the side of the sensor.

① Signal of solenoid	Two-Position Directional Control Valve			
	① a(b)	③ Sa(Sb)	LED

Mounting screws 14 Nm (10.3 lbf.ft)
M6 x 45 DIN 912-10.9

Technical Features

- › Direct acting directional control valve with subplate mounting surface acc. to ISO 4401, DIN 24340 (CETOP 05)
- › High transmitted hydraulic power up to 350 bar with optimized design to minimize pressure drop
- › Five chamber housing design with reduced hydraulic power dependence on fluid viscosity
- › Wire box for solenoid electrical connection with cable gland [1/2" NPT]
- › Optional 3-pin or 5-pin connector acc. to ANSI/B93.55M
- › Type for AC power supply with a rectifier bridge built in the wire box
- › Wide range of interchangeable spools and manual overrides available
- › CSA Certificate upon request
- › Soft-shift spool speed control option
- › Optional shift position indicators (raised arrows) installed on the terminal plate
- › In the standard version, the valve housing is phosphated and steel parts zinc-coated for 240 h salt spray protection acc. to ISO 9227
